1. Plaintiff furnishes water services to various residences in the Mint Canyon area of Santa Clarita, California. Plaintiff and its predecessor in interest, New Mint Water System, an unincorporated association, have been providing this service for over 60 years.

2. On information and belief, in or around 1957, New Mint Water System sought to purchase a parcel of property in Mint Canyon within the County of Los Angeles and to install a water tank on such parcel (the "Parcel") in furtherance of its water service.

4. By way of New Mint Water System's incorporation as New Mint Association in 2020, under Corporations Code section 7121(d), New Mint Water System's property became Plaintiff's property.

Purpose of This Meeting
The South Coast Air Quality Management District (South Coast AQMD) has scheduled a Public Workshop to present and solicit information and suggestions from the public on Proposed Amended Rule 1118 -Control of Emissions from Refinery Flares (PAR 1118) which is scheduled for a Public Hearing before the South Coast AQMD Governing Board on January 2, 2026 (subject to change).

Background

January 2, 2026 (subject to change). Background
Rule 1118 - Control of Emissions from Refinery Flares (Rule 1118), originally adopted by the South Coast AQMD Governing Board in 1998, established requirements to monitor, control, and minimize emissions from refinery and related from controling and to reduce minimize emissions from refinery and related flaring operations and to reduce emissions from flaring events operated at refineries and related facilities. Flare monitoring, recordkeeping, and reporting of flaring events are provided through the Flare Notification Event System (FENS), and the public inquiry hotline. Since its adoption, Rule 1118 has undergone four amendments in 2005, 2017, 2023, and most recently in 2024. The 2024 amendment introduced several key changes including lowering the annual sulfur dioxide performance target, a new annual nitrogen oxide performance threshold for clean service flares. a new new annual nitrogen oxide performance threshold for clean service flares, a new operational requirement for liquified petroleum gas clean service flares, adjusted mitigation fees in accordance with the most recent Consumer Price Index,

the most recent Consumer Price Index, and updated reporting requirements. Objective of Proposed Amended Rule The objective of PAR 1118 is to correct an omission from subdivision (I), Flare Event Notification Requirements by updating paragraph (I)(7) to include paragraph (I)(5). Prior to the 2024 amendment, paragraph (I)(7) had allowed facilities to submit notifications via 1-800-CUT-SMOG when FERN was unavailable; however, the notification requirement for the exceedance of 100,000 standard cubic feet of vent gas from a flare was inadvertently omitted notification requirement for the exceedance of 100,000 standard cubic feet of vent gas from a flare was inadvertently omitted from paragraph (1)(7). The proposed amendment aligns with the original intent for paragraph (1)(7) which applies to all notifications described in paragraphs (1)(2) through (1)(5). In addition, amendments are proposed that would replace the standard compliance date placeholder language "[18 Months After Rule Adoption]" in paragraph (1)(10) with the actual compliance date of "October 5, 2025," which is the date that corresponds to 18 months after April 5, 2024, which was the date of rule adoption. California Environmental Quality Act Pursuant to the California Environmental Quality Act (CEQA) and South Coast AQMD's certified regulatory program (Public Resources Code Section 1251(1) and South Coast AQMD, as lead agency, is currently reviewing the proposed project (PAR 1118) to determine if it will result in any potential adverse environmental impacts. Appropriate CEQA documentation will be proposed. Appropriate CEQA documentation will be

prepared based on the analysis.
